

7 Heart's Desire (Sum of the vowels in the name = 7)

“Imagination is more important than knowledge” and “We can't solve problems by using the same kind of thinking we used when we created them.” - **Albert Einstein**, Theoretical Physicist and Nobel Prize winner in Physics for his explanation of the photoelectric effect, **7 Heart's Desire**.

	6				1				6+1 = 7
	1+5 = 6				5+9+5+9 = 28 = 2+8 = 10 = 1+0 = 1				7 Heart's Desire

Please note: The following **WILL BE** modified, to a greater or lesser extent, by other numbers in your chart! Other strong 7 energy elsewhere will reinforce these potentials. Weak 7 energy or conflicting numbers elsewhere will dilute these potentials (for a listing of numbers incompatible with 7, click [here](#)). Please keep this in mind.

Potential Positives

- You like time to be alone with your thoughts in peace and silence. You enjoy dreaming, contemplating, introspecting. A conducive environment for all of this is nature, which you love.
- You have an intellectual, analytical mind. You also have a deep, intuitive and very sensitive mind. You also have a very abstract, theoretical and philosophical mind. All of this gives you great and wonderful gifts of the mind!
- You are very perceptive and observant. You crave knowledge and insight and want to study things in-depth to understand the principles and fundamentals. You like to search beneath the surface because you want to understand how and why things work at the deepest level.
- You love to analyze, investigate, dissect, examine anything you are curious about from every angle.
- You have natural gifts for analysis, research and investigation. Once your analytical mind understands the fundamental facts of any subject you are interested in, your theoretical, intuitive and abstract mind takes over and elevates your thinking stratospherically. This is what gives you great insight and unique solutions to problems. Is it any wonder Albert Einstein had a 7 Heart's Desire?
- You could excel in an intellectual, scientific, philosophical, technical, theoretical, religious or metaphysical occupation, depending on the other numbers in your chart. You are also a natural teacher because you love sharing your wealth of knowledge and wisdom.
- You probably like things that are refined, antique or aged by time (such as old paintings, rare books, old gardens, exquisite antique furniture, black and white old photographs or pictures, etc.)
- If 7 energy is very strong in your chart (especially if coupled with 9, 11 or 22 energy) you could be an authentic sage or wise seer. Many other factors need to be considered here though.
- If you are very spiritual you probably love to meditate (to attain inner perfection) and want to understand the mysteries of life. You have learned to trust your inner voice to guide you.

Potential Negatives

- You can have difficulty in casual conversation because you are innately shy, timid and introspective. Because of your astute self-awareness you no doubt know this about yourself yet still struggle when making small talk. Consider taking a communications course.
- You have very strong emotions but you repress most of them. You can seem cold, prideful, secretive or aloof to others because you are somewhat reserved by nature and don't readily express your feelings. This can trigger other people's own insecurities when they are around you and they likewise may seem standoffish or unaffectionate toward you. All of this makes you feel lonely and misunderstood. Your greatest challenge is to trust, open up your heart, and let others in. Get over your sensitive shyness and have the courage to open up! Then others will most likely too!
- Isolating yourself from others and/or finding fault in others will lead to bitterness and a cynical attitude towards life. This will cause you a great deal of depression. Share yourself with others (not just your insights) without compromising your very real need for independence.
- You could end up living in the dream and fantasy world of your mind more than the real world.
- You abhor shallowness and can be supercilious with people who are less insightful than you are. It may be true that others are less insightful than you but they have gifts that you probably don't, like spontaneity and vivaciousness, for example, in the 3 or outrageous adventurousness in the 5.
- If you are too private/unaffectionate and do not learn to communicate your feelings your intimate relationships can be very difficult indeed.
- Like the Heart's Desire 4 you can be too exacting with yourself. Learn to balance your overly serious and austere nature with some fun and frivolity (find someone with a lot of 3 or 5 energy to help you).
- If 7 energy is strong in you, you might seem eccentric because of your propensity to withdraw from the world and get out of touch with mainstream reality.
